[image001.png](#)

Good Morning,

As we discussed, attached is a list of pending air applications for rock crushers in the state. Please note that if the Project Type is "Initial" it is for a new permit. Any other project type means the application is for an Amendment, Location Change, or Renewal of an existing permit.

Please let me know if you have any questions.

Thank you.

Beryl Thatcher

Subject: RE: Follow-Up Information to Call

Ms. Thatcher, good morning. If possible, would you please contact me this morning? The two issues I would like to discuss include:

A. Number of rock crushers per APO

B. Number of [statewide APO registrations and permit applications](#) that are in the TCEQ pipeline.

Respectfully, Lawrence Bailey

Office: 512.463.0325

Subject: Follow-Up Information to Call

Mr. Bailey,

It was nice speaking to you this morning. Attached are the two lists you inquired about. The pending projects list for Representative Biedermann's district has been updated to reflect the status of the permit application, including issuance date if the project is no longer pending. The second list shows all the APO registrations in House District 73 that also have an issued air permit. In the "Permit Type"

column, CONSTRUCT is a case-by-case permit and the PBR and STDPMT is for a registration under either a permit by rule or standard permit. As we discussed, I've also included a column to indicate if a rock or concrete crusher is authorized. If that cell is blank, then there is another type of facility that is authorized by that air permit.

Please let me know if you have any questions or would like to discuss further.

Thank you.
